CHARACTERISTICS OF THE MODALITIES

OD, OS, JD, JS, WD AND WS: these are modalities that will be played in two phases, the first in Swiss systems or groups and the second in simple elimination. Groups or Swiss OD would be played with 5 games and OS, JD, JS, WD and WS with 4 games. Once the phase is over, a eliminator will be played which in the case of OD, WD, OI and WS, will be a best of 5 and in the case of JD AND JS it will be a best of 3.

In all these modalities, the groups or the Swiss system will classify all couples for the pro series, which will be assigned a position in the elimination phase according to their classification in the group, behind the seeds in the case of OD AND OS. In the rest there are no seeds.

MI and PD will be played using a double ko system, best of 5 for the winners' bracket and best of 3 for the losers' bracket.
